

# JAKE MARSH

## EXPERIENCE

- 10.2014 TO PRESENT **Chief Web Officer**  
*PunditTracker*
- Sole frontend engineer, developing the next generation of the user-facing web application using ReactJS and RefluxJS.
  - Assist in architecture, product, and design decisions as we reinvent the product and brand.
- 10.2012 TO 10.2014 **Student Webmaster**  
*University of Maine University Relations - Orono, ME*
- Created and modified Wordpress templates in Photoshop and implement them in HTML, CSS, and PHP to be used across the UMaine system.
  - Updated and maintained content and design across the UMaine domain.
- 06.2014 TO 08.2014 **Software Engineering Intern**  
*Venmo - New York, NY*
- Worked to develop the next generation of Venmo web applications. Technologies used include React, Backbone.js, node.js, Require.js, and LESS.
  - Spearheaded the redevelopment of Venmo's consumer-facing marketing website using Assemble.js, Require.js, React, and LESS.
  - Served as the lead web developer on multiple experimental products internally.
- 05.2013 TO 08.2013 **Software Engineering Intern**  
*Coyote Logistics - Chicago, IL*
- Worked in an Agile/Scrum environment helping to develop both internal and external software. Technologies used include SQL, Backbone.js, C#, ASP.net, and Team Foundation (TFVC).
  - Developed employee intra-office relocation software to be used internally. Technologies used include SQL, AngularJS, C#, and ASP.net.
- 07.2012 TO 09.2013 **Student Webmaster**  
*University of Maine School of Economics - Orono, ME*
- Assisted the School of Economics in maintaining the department website both in terms of content and structure via Wordpress.
  - Maintained the School of Economics' social media presence by regularly updating outlets such as Twitter, Facebook, and LinkedIn.
- 01.2012 TO 07.2012 **Student Research Assistant**  
*University of Maine Knowledge Transfer Alliance - Orono, ME*
- Worked with local small businesses to help them develop and grow a web presence in order to further grow their businesses.
  - Consulted one-on-one with these business owners in order to personally develop their sites via Wordpress.
  - Sites were created by using HTML, CSS, and PHP to modify and customize themes.

## EDUCATION

- 09.2011 TO PRESENT **B.S., Computer Science**  
**B.S., Economics**  
*University of Maine*

## PROJECTS

- Neural Network Stock Predictor [2014]**  
*Python, Flask, Javascript, AngularJS*
- Developed a Python application that takes a stock symbol as input, retrieves rolling historical data, and uses a neural network to attempt to predict future stock prices. Exposed the application via a Flask API and created a simple frontend using AngularJS and Bootstrap.
- Campuslively v2.0 [2013]**  
*SASS, Javascript, AngularJS, node.js, Express, MongoDB*
- Designed and developed the second iteration of Campuslively utilizing the MEAN stack and hosted on Heroku. The application was designed and developed for college students and faculty to easily view and share events happening around their campus.
- Downloader [2013]**  
*Javascript, AngularJS, node.js, Express, MongoDB*
- Created an open-source, anonymous web application for sharing files, built on the MEAN stack. MongoDB (along with GridFS) were used for storing and retrieving files, exposed to an AngularJS frontend by a node.js/Express server.

## SKILLS

PROFICIENT	Javascript	AngularJS	node.js
	CSS	SASS	jQuery
	Wordpress	Adobe Suite	React
COMFORTABLE	Python	Git	PHP
	Agile/Scrum	C	SQL
FAMILIAR	Java	C#	Flask
	ASP.net	Backbone.js	Amazon Web Services
